Facebook

Make recycling extra fun by building a recycled robot with your little one! Use empty cereal boxes, egg cartons, yogurt cups, foil, bottle caps and of course, your imagination! Make up a story together about how your robot can help the Earth! #TalkingIsTeaching

Gardening is an excellent way for your child to learn about all the nutritious and delicious foods that come from the Earth. Plant an herb in a bowl or pot at home and watch as the seed turns into a plant! As you grow the plant together, your child's love for the Earth will also bloom! For more ideas on how to talk, read, and sing about the earth, click here: <https://bit.ly/3BWUftD>

There are many ways to help care for the earth and reduce waste, and thrift shopping is one of them! With your child, point out the different colors and shapes at your local thrift store. "Which shirt is your favorite? Do you like the red one or yellow one?" #TalkingIsTeaching

Spending time outdoors will help your child naturally develop a love and respect for the world around them. Enjoy a peaceful afternoon in nature with your little one and talk about the colors, shapes, smells, and sounds all around you! #TalkingIsTeaching

Put your little one in charge of bringing the reusable bags with you on shopping trips. Talk about how bringing your own bags helps reduce plastic waste and ask your child if he has any other ideas on how your family can use less plastic every day! #TalkingIsTeaching

Help your child start a recycled craft bin! You can collect things like bottle caps, paper towel rolls, bubble wrap, straws, and plastic cutlery in a small bin. During craft time, let your child use her imagination to turn recycled treasures into beautiful works of art! #TalkingIsTeaching
